INTRODUCTION

In line with Pillar 3 of Basel 3 and the Decision on Disclosure of Information and Bank Information, Halkbank a.d. Belgrade publishes a report as of June 30th 2021, which contains information about:

1. The Bank's capital structure (PI-KAP);
2. Financial instruments that are included in the calculation of the Bank's capital (PI-FIKAP);
3. Linking the capital positions from the balance sheet to positions in the form PI-KAP (PI-UPK);
4. The amount of capital requirements and the capital adequacy ratio (PI-AKB);
5. Risk mitigation techniques and
6. Leverage ratio.

The report is published on the Bank's website (www.halkbank.rs).

In accordance with item 24 of the Decision on Disclosure of Data and Information by Banks ("Official Gazette of the Republic of Serbia" No. 103/2016) and the internal procedure, the Executive Board on September 23rd, 2021 has assessed the frequency of disclosure of data and information of the bank taking into account:

1. Scope of business operations;
2. Banking products offered to clients;
3. Presence in different countries;
4. Participation in the banking sector;
5. Participation in international financial markets;
6. Participation in the international payment, billing and clearing system;

The decision was made that there is no need to publish data and information prescribed by the National bank of Serbia (hereinafter: NBS) Decision on Disclosure of Data and Information by Banks (hereinafter: Decision) more than once a year, except for data prescribed in items 5, 6 and 19 of the NBS Decision on the amount of capital, capital structure, capital adequacy and leverage ratio, as well as techniques for mitigation of credit risk, which the NBS has prescribed to be published semi-annually.

The Bank will publish the data specified in points 5 and 6 of the Decision, which relate to capital, its structure, capital requirements and capital adequacy, as well as point 19, referring to the indicator of leverage, on semi-annually basis.

d* In calculating the position of the revaluation reserve and other unrealized losses as a part of regulatory capital, the value adjustments of debt securities in the amount RSD 34,120 thousand were not taken into account.

The Bank does not have subsidiaries and therefore does not carry out consolidated reporting.

Deductible items of share capital consist of:

- Additional adjustments to the Bank's assets measured at fair value in accordance with paragraphs 315 to 318 of the DCA is calculated as 0.1% of the sum of the absolute values of assets and liabilities that are measured at fair value in accordance with IFRS / IAS and amount to RSD 14,204 thousand.
- Intangible assets of the Bank (investment in licenses, patents and software) in the amount of RSD 424,051 thousand.
- Deferred tax assets that depend on the future profitability of the bank, except those arising from temporary differences in the amount of RSD 62,393 thousand.
- Gross amount of receivables from the debtor - individuals (except farmers and entrepreneurs) on the basis of approved consumer loans, cash loans or other loans recorded in the accounts 102, 107 and 108 in accordance with the decision prescribing the Chart of Accounts and the contents of the Account in the Account framework for Banks where the level of credit indebtedness of that debtor was higher than the percentage determined in accordance with the Decision governing the classification of the balance sheet assets and off-balance sheet items of the bank in the amount of RSD 53,877 thousand.

3. CAPITAL REQUIREMENTS AND CAPITAL ADEQUACY OF THE BANK

In order to fulfil the obligations to creditors, and to ensure stable and safe operations, the Bank is obliged to maintain capital adequacy ratio at the prescribed level.

Capital requirements of the Bank are determined in accordance with the NBS Decision on capital adequacy and they are determined for credit risk, FX risk and operational risk.

In the form PI-AKB presented below the bank has published the following information i.e. information related to capital adequacy:

- Amount of capital requirements for credit risk, including counterparty risk and settlement / delivery risk based on free deliveries, for each class of exposure;
- Amount of capital requirement for settlement / delivery risk arising from unsettled transactions;
- Amount of capital requirement for FX risk and the type of the applied approach for calculating the individual capital requirements for these risks,
- Amount of capital requirement for operational risk and the type of the applied approach for calculating the request, with a special publication of the amounts for each of the approaches used by the bank for the calculation of that requirement;
- Coverage of capital requirements by the basic, or additional capital, related to restrictions provided by the Decision on bank's capital adequacy;
- Capital adequacy ratios.

All indicators of capital adequacy are above the prescribed minimum level, in accordance with the Decision on the capital adequacy of the bank.

Data regarding Capital Requirements and Capital Adequacy Ratio are shown in report **PI-AKB** (prescribed by NBS):

3.	Common Equity Tier 1 Capital	14,165,917	2,543,079	6.00%	11,622,838	20.57%

The capital requirement for credit risk is calculated using the standardized approach, multiplying total credit risk weighted assets with minimum capital adequacy ratio prescribed by the NBS.

The capital requirement for credit risk amounts to RSD 4,092,828 thousand.

The Bank is not exposed to the dilution risk and the settlement / delivery risk.

Below is an overview of the exposure for a class of retail:

Retail exposures	Capital requirements (RSD thousand)
Secured by mortgages on immovable property	133,357
Exposures to small and medium-sized enterprises classified as retail exposures	731,616
Total retail exposures	1,534,474

The Bank does not have specialised lending exposures.

To equity exposures the Bank assigns a risk weight of 100% using the standardized approach.

The Bank can use appropriate credit protection instruments in order to reduce credit risk, adjusting credit risk-weighted assets for the effects of credit risk mitigation techniques.

Appropriate credit protection instruments that the bank can use are the following:

1. Material credit protection instruments in the form of financial assets,
2. Immaterial credit protection instruments, namely guarantees, other types of warranties and counter guarantees.

The Bank applies the simple method for adjusting the risk-weighted assets, using credit risk mitigation instruments.

As of June 30th, 2021 the Bank has used credit protection instruments in the form of financial assets i.e. cash deposits and letters of guarantee issued by Republic of Serbia Ministry of finance.

Below are presented exposures of the bank according to exposure classes before the application of credit mitigation techniques and after the application of credit mitigation techniques:

Effects of using appropriate credit protection material and immaterial instruments measured through the reduction of credit risk weighted assets are presented in the following table:

in RSD thousand

Credit protection instrument type	Amount
Material credit protection instruments	3,196,215
Immaterial credit protection instruments	1,880,821
Total:	5,077,036

Capital requirement for FX risk is calculated by multiplying the sum of total net open foreign currency position and absolute value of net open position in gold with a minimum capital adequacy ratio prescribed by the NBS.

Given that the Bank has no net open position in gold, the Bank is calculating the capital requirement for foreign exchange risk, if the sum of the total net open foreign currency position is more than 2% of the bank's capital calculated in accordance with the provisions of chapter III of the NBS Decision on the Bank's Capital Adequacy.

The capital requirement for operational risk is calculated using the basic indicator approach and is equal to the value of the three-year average exposure indicator (sum of net interest income and net non-interest income) multiplied with the capital requirement rate prescribed by the NBS for this approach.

Exposure indicator is calculated based on the following elements:

- Interest income and interest expense
- Revenues from dividends and participation
- Revenues and expenses from fees and commissions
- gains and losses on sale of securities
- income and expenses from revaluation of assets and liabilities
- revenues and foreign exchange losses
- other operating income.

In calculating the exposure indicator is not included:

- impairment losses on investments on the basis of balance sheet items
- Provisions for off-balance sheet positions
- Other expenses from operations
- realized gains / losses on financial assets not held for trading
- other income arising other than from ordinary business activities (e.g. income arising from insurance contracts)

4. LEVERAGE RATIO

The leverage ratio is calculating as ratio of Tier 1 capital – sum of Common Equity Tier 1 capital and Additional Tier 1 capital in accordance with the NBS Methodology for leverage ratio report. The ratio is expressed as a percentage.

Leverage ratio calculated in accordance with the decision governing reporting requirements for banks as of June 30th. 2021 amounts 13.09%.
